Preface.

For many years past a brief History of railways constructed and in progress has been included in the Administration Report on the Railways in India, but as a great deal of the information contained in it consists of standing matter relating to details of construction, contracts, etc., which is of little or no use to many of those to whom the report is supplied, and as it also appears unnecessary and inappropriate to include such information in an annual report, it has been decided by the Railway Board to omit it from future issues of the Report and to print it as a separate publication quinquennially. The present edition has been corrected up to 31st March 1918 and space has been allowed in the statements of statistics of working to admit of these being kept up to date.

For facility of reference and convenience railways in this volume have been grouped by systems.

For the purpose of recording statistics of working, the year in which any radical change was made in the physical or financial constitution of a railway, such as, in the case of companies' lines, the date of purchase by Government, or of important modifications in the contracts with the Secretary of State, has been taken as the starting point.

In the case of lines which are of secondary importance, *e.g.*, 2' 6" and 2' gauge lines, Native State lines and some of the smaller metre gauge railways, statistics for the last 10 years only have been included.

Where railways have been absorbed into larger systems, the statistics of working prior to amalgamation have been omitted, as they no longer serve any useful purpose, and those for the joint concern included in the table of the joint concern from the date of absorption.

GENERAL.

From the year 1906-07 Interest on Debt in India has been calculated at the actual average rate for the year of interest on the mean non-specific debt of India, instead of at the fixed rates of $\frac{1}{2}$ and $\frac{3}{4}$ per cent previously employed. The actual rates from 1906-07 to 1917-18 were 3·437, 3·412, 3·384, 3·384, 3·377, 3·401, 3·500, 3·388, 3·499, 3·4725, 3·2964 and 3·4730 per cent, respectively.

One effect of the change is that, in some cases, while the capital outlay on a railway at the end of 1907 was more than that at the end of 1906, the interest charge in connection therewith was less.

BOMBAY, BARODA AND CENTRAL INDIA RAILWAY SYSTEM—*contd*

Bombay, Baroda and Central India railway (5' 6" gauge)—*contd.*

Details of construction—

Permanent-way.—The main line is laid with 69-lb. double-headed, 82-lb. bull-headed and 90-lb. flat-footed steel rails on creosoted pine, Australian and oval pot sleepers.

The branches are laid mostly with 69-lb. double-headed and 75-lb. flat-footed steel rails on oval pot and wooden sleepers. The Godhra-Rutlam-Nagda section is laid with 75-lb. flat-footed steel rails on transverse steel, deodar, creosoted pine sleepers and cast iron pots and the Nagda-Muttra section with 87-lb. and 90-lb. flat-footed steel rails on *sāi*, deodar, Australian wood sleepers and cast iron pots north of Nagda.

Ballast.—The line is mostly ballasted with broken stone, gravel and shingle.

Fencing.—Excepting the Pātri branch the line is fenced throughout. One hundred and thirty-seven miles of the Godhra-Rutlam-Nagda section and the station yards only on the rest of this section, are fenced. On the Nagda-Muttra section most of the station yards only are fenced.

Curves.—The sharpest curve on the main line and on the Godhra branch is of 1,500 feet radius, on the Pātri branch of 2,885 feet radius, on the Godhra-Baroda chord of 1,910 feet radius, on the Godhra-Rutlam-Nagda section of 1,000 feet radius and on the Nagda-Muttra section of 1,275 feet radius.

Gradients.—The ruling gradient on the greater part of the main line is 1 in 500, but there are short lengths of 1 in 200 at the approaches to major bridges. On the Godhra branch the ruling grade is 1 in 200, except for a short length at the Mahi low level bridge where it is 1 in 80; on the Pātri branch and the Godhra-Baroda chord it is 1 in 300, except for short lengths of 1 in 200 on the latter. The ruling gradient on the Nagda-Muttra section is 1 in 200, as also on the Godhra-Rutlam-Nagda section with short lengths of 1 in 100 and from 1 in 101 to 1 in 150 between Godhra and Jekot.

Details of construction—

Permanent way.—Except from mile 10 to mile 24·69 of the Mehsana-Patan section, which is laid with 40-lb. iron rails on deodar sleepers, the line is laid with 4½-lb. flat-footed steel rails on steel, deodar, half round jungle teak and Australian hard wood sleepers.

Ballast.—The line between Mehsana and Taranga Hill is ballasted with stone, between Manund Road and Harij and between Chanasma and Bechraji, with lime stone and the rest with kunkur.

Fencing.—Of the Manund Road-Harij and Chanasma-Bechraji sections only the station yards are fenced; and of the other three sections 4½ miles are fenced by wire, and the rest with cactus, but this latter has in several places been entirely destroyed by floods and locusts and what remains is much broken up. On the Patan-Kakosi section only the station yards are fenced.

Curves.—The sharpest curve is of 1,910 feet radius.

Gradients.—On the Mehsana-Kheralu section the ruling gradient is 1 in 150, except for 5,100 feet, between Varethia and Taranga Hill, where it is 1 in 75. On the Mehsana-Virangum section it is 1 in 400, except for 1,350 feet between miles 5 and 6 where it is 1 in 200 and 900 feet between miles 12 and 13 where it is 1 in 300. On the Mehsana-Patan section it is 1 in 400, except for 850 feet between miles 6 and 7 where it is 1 in 200. On the Patan-Wagrod section it is 1 in 150, on the Manund Road-Harij section, 1 in 200 and on the Chanasma-Bechraji section, 1 in 366, all in banking section.

The railway serves all the Docks of the Port of Bombay and also the Bunders on the east of the Island north of the Ballard Pier, as well as various depôts allotted to certain trades, and is used for goods and troop traffic only.

It consists of a double line track for its whole length, as well as of reception and sorting yards, depôts stations, and numerous sidings in the docks.

Sanction to the construction of this line by the Bombay Port Trust was conveyed in Railway Board's Notification No. 152, dated the 28th May 1913, and at the end of March 1918, 105 miles of track were laid and connected up.

Details of construction—

Permanent-way.—The tracks are laid throughout with 75-lb. flat-footed steel rails on wooden sleepers principally jarrah, teak and sal with spike fastenings.

Ballast.—As the greater part of the railway is laid on newly reclaimed ground, moorum ballast is used extensively for packing and boxing, and will be used until such time as it is considered that a firm formation has been obtained. On old ground blue stone trap ballast is provided. Over several parts of the Sewri-Mazagon reclamation it was found necessary to carry the rails on wooden mattresses owing to severe settlement. The largest mattress is 900 feet long.

Fencing.—The line is being fenced where necessary.

Curves.—The radius of the sharpest curve is 800 feet outside the dock area and 500 feet within the docks.

Gradients.—The steepest grade on the line is 1 in 277, near the Nawab Tank bridge.

CALCUTTA PORT COMMISSIONERS' RAILWAY (5' 6" gauge)—

The railway serves the godowns, warehouses, jetties, workshops, jute, sugar, tea, rice and grain depôts, timber yards, mills and coal depôts on both the Calcutta and Howrah Foreshores, and is used for only goods traffic. The railway consists of single and double tracks, and there are a large number of sidings for crossing trains and loading goods. The mileage of track including all sidings amounts to 15.928.

The first section, from Chandpal Ghât to Kidderpore Docks, was laid in 1886, being included in the general sanction for the Docks, and was used solely for the carriage of material for the construction of the Docks. It was opened to general goods traffic in 1891.

Details of construction—

Permanent-way.—The permanent-way consists mostly of steel rails and sleepers of wood and iron. The steel rails are of various types: (i) 90-lb. flat-footed laid on (a) the new double goods track between Dum Dum Junction and Kankinara, and between Sealdah and Kakurgachi, (b) the up and down tracks between Kankinara and Ishurdi and Poradaha and Jagati, (c) the track between Ishurdi and Santahar, (d) the line from Jagati Junction *via* Kushtia (Chord, to Faridpur and the Kushtia loop line, (e) the Murshidabad branch between Ramghat and Krishnagar city, (f) the up and down tracks on the Pattipooker-Chitpore connection, from Pattipooker to sub-way at Canal Junction Cabin, (g) the up and down tracks on the low level line between Dum Dum and Canal Junction, (h) the whole of the Central section; and (i) the up and down tracks between Beliaghata and Tiljala and between Ballyganj and Baranipur and the single line between Baranipur and Diamond Harbour and between Sonarpur and Taldi; (ii) 85-lb. bull-headed laid on (a) the original double line between Calcutta and Kankinara, (b) the new double track between Dum Dum and Kakurgachi and (c) the up and down tracks between Kakurgachi and Majherat *via* Tiljala; (iii) 75-lb. double-headed laid on the third track between Nailhati and Halishahar; (iv) 75-lb. new pattern flat-footed laid on the Murshidabad branch between Krishnagar city and Lalgolaighat; (v) 73-lb. double headed laid on the Southern section between Taldi and Canning and Majherat and Budge Budge; and (vi) second-hand 62-lb. flat-footed laid on the Churni Extension.

The line from sub-way at Canal Junction Cabin to Chitpore, is laid partly with 75-lb. double-headed and partly with 75-lb. flat-footed rails. A few short lengths near ghat stations at Goalundo are still laid with old iron permanent-way.

All flat-footed rails, as a rule, are laid on wooden sleepers, excepting for a few short lengths between Nailhati and Poradaha where cast iron sleepers have been used under 90 lb rails. The 85-lb. bull-headed rails are laid on the Denham and Olphert's sleepers, with wooden sleepers at joints and continuous joint pattern combined chair-fish plates, or on Denham and Olphert's cast iron sleepers, with wooden sleepers and cast iron chairs with wooden keys at joints. The 75-lb. double-headed rails are laid on the ordinary cast iron or on Denham and Olphert's cast iron sleepers. The 73-lb. double headed rails are laid on Denham and Olphert's cast iron or on wooden sleepers with cast iron chairs and wooden keys.

Ballast.—On the main line of the Eastern section, from Bhairamara to Shakhole, the line is ballasted with broken trap and onward to Santahar with shingle. Where 85-lb. bull-headed rails have been laid, brick ballast has been replaced by stone. The ballast on the lengths relaid with 90-lb. rails is also being gradually replaced with stone. The bottom ballast on the Murshidabad branch is brick and the ballasting is being completed with stone. The second tracks between Poradaha and Bhairamara and Poradaha and Jagati are ballasted with broken trap and shingle, respectively. The new double goods track between Kankinara and Dum Dum is fully ballasted with shingle. The new second track between Ballygunge and Baranipur on the Southern section is mainly ballasted with brick. The Canning branch is practically unballasted and the Faridpur branch only at the bridges.

Fencing.—The whole of the Eastern section is fenced, except between Pachooria Junction and Goalundo and the Faridpur branch. The Southern section is fenced except the Canning branch. The Central section is fenced throughout.

Curves.—The sharpest curve is of 1,000 feet radius.

Gradients.—The ruling gradient is 1 in 300; except between miles 160 and 162 on the Faridpur branch, where it is 1 in 100. There is also a short length of 1 in 200 grade on the low level approaches to Chitpur from Dum Dum junction.

Details of construction—

Permanent-way.—The permanent-way consists of 90-lb. flat-footed steel rails laid on *sāl* and *jarrah* sleepers on the main line and passenger sidings and on old steel trough sleepers on the goods sidings. The permanent way on the Sirajganj Ghat line consists of 75 lb. double headed and flat-footed rails laid mostly on wooden sleepers.

Ballast.—The ballast consists of sandy earth just sufficient to pack the line for running.

Fencing.—The line is unfenced.

Curves.—The sharpest curve is of 5,730 feet radius.

Gradients.—The ruling gradient is 1 in 300.

Contract—

Dated the 14th April 1916, between the Secretary of State for India and the Sara-Sirajganj Railway Company, as to the construction, maintenance and working of the Sara-Sirajganj railway, by the agency of the Eastern Bengal railway.

Main provisions of contract—

- (i) **Land.**—Land in British territory provided by Government free of cost.
- (ii) **Government-aid.**—For the more convenient and economical construction of the railway, its execution was undertaken by the Government, who also stock, manage, maintain and work it through the agency of the Eastern Bengal railway. The Government agree to allow to the Company, in respect of each year, by way of rebate, such a sum, not exceeding in any year the net earnings from traffic interchanged between the Eastern Bengal railway and the Company's railway, as shall, together with the net earnings of the Company for the said year, make up an amount equal to interest for such year at a rate of 5 per cent. per annum on the share capital of the Company for the time being paid up and shall also allow Rs. 15,000 per annum and such other actual expenses as may be incurred by the Company for or towards office expenses and expenses of management and direction of the Company and also such legal expenses as shall have been approved by the Secretary of State.
- (iii) **Terms of working.**—For management, maintenance, working and the use of rolling-stock, the Eastern Bengal railway shall retain, every half-year, a percentage of the gross earnings of the Sara-Sirajganj railway, which shall bear the same proportion to the gross earnings of the said railway, as the working expenses of the Eastern Bengal railway, including the said railway bear to the gross earnings of the Eastern Bengal railway, including the said railway, up to a maximum of 50 per cent.
- (iv) **Distribution of profits.**—If the net earnings exceed 5 per cent. on the paid up share capital of the Company, the office expenses and expenses of management of the Company, as at (ii) above, shall be a first charge on the surplus profits and the balance of the profits shall be divided equally between the Secretary of State and the Company; provided that if the surplus profits are insufficient to meet the administration charges the balance will be paid to the Company by the working agency out of the stipulated percentage of the earnings retained by the working agency as working expenses.
- (v) **Rates and fares.**—Same as on the Eastern Bengal railway.
- (vi) **Special obligations as to the conveyance of—**
 - (a) Mails, troops, police, high Government officials and Government stores—
 - (b) Government bullion and coin and the persons in charge thereof—

} None specified.
- (vii) **Power of the Government to determine contract.**—The Government may determine the contract, by giving 12 months' "notice of purchase", either on the 30th September 1948, or on the 31st day of March in the last year of any subsequent period of ten years, in which case the Government undertake to pay to the Company, within 4 months from the date of the determination of the contract, a sum equal to 25 times the amount of the average yearly net earnings of the Company's line (excluding payments on account of rebate) derived during the three years preceding the time at which the contract is determined, provided that the total amount so payable to the Company does not exceed 20 per cent the total capital expenditure of the Company or is less than such capital expenditure.
The contract may also be determined by giving to the Company 12 months' "notice of special purchase" in the following cases:—
 - (a) When the Secretary of State considers it desirable that the gauge of the said railway should be altered.
 - (b) When it is desired to convert the said railway into a line of through communication.
 - (c) When the Secretary of State desires to extend the said railway and the Company does not, within six months from date of formal requisition from the Secretary of State, raise such additional capital as is necessary for this purpose.

If the contract be determined by "notice of special purchase", the Government undertakes to pay to the Company 25 times the average net earnings of the Company's line (excluding payments on account of rebate) derived by the Company during the three years preceding the time at which the contract is determined or 115 per cent of the total capital expenditure of the Company whichever may be the greater.

Forty-one miles of the Santahar-Kaunia loop, between Nasaratpur and Bonarpara and the up and down lines between Teesta and Lalmonirhat are laid with 60-lb. flat-footed steel rails, B.S. The lines from Manihari to Katihar, Golakganj to Dhubri, and Buxa Road to Jainti and the Kandirpara Ghat line, are laid with 4½-lb. flat-footed steel rails. Nine miles of Dacca section are laid with 64-lb. double-headed and the remainder, with 62-lb. flat-footed second-hand steel rails. On the Tangla extension, the Dalsingpara branch and in certain station yards of the Dacca section the rails are second-hand 4½-lb. flat-footed.

On the unfenced sections the station yards are usually fenced.

Curves.—The sharpest curve is of 575 feet radius.

Gradients.—The ruling gradient on the 3' 3½" gauge section is 1 in 200 which occurs at the approaches of large bridges and fairly frequently and for long lengths on the Gaubati extension where there are also short lengths of 1 in 100 and 1 in 125 between Pandu station and Gaubati. On the Santrabari extension and on the section from Raja Bhat Khawa to Kalchini the ruling gradients on the last few miles near the hills are 1 in 100, and 1 in 150, respectively, but there is a small length of 1 in 50 between Buxa Road and Jainti.

East Indian railway (5' 6" gauge)—

The lines owned by the late East Indian Guaranteed Railway Company were purchased by the State in 1879, and all the contracts then subsisting between the Secretary of State and the company (except those relating to debentures or debenture stock) were determined. The purchase price was £32,750,000, and it was provided that this should be paid in the form of a terminable annuity of the amount of £1,473,750, payable from the 1st January 1880 to the 14th February 1953. One-fifth of the annuity was deferred, and the holders of this portion (representing a capital sum of £6,550,000) constitute the present East Indian Railway Company. Since the purchase certain State and Companies' branch lines were incorporated in the undertaking.

Details of construction—

Permanent-way.—The main line from Howrah to Delhi, including Howrah-Burdwan chord, the Grand Chord, the Loop line from Khana Junction to Kiul, the Jubbulpore branch, Tarkessur branch, Jharia branch, Ondal loop, Ikrah branch, Giridih branch, Patna-Gya branch, Barun-Daltonganj branch, Agra branch, Shikohabad-Farukhabad and Bandel-Barharwa branches are laid with steel rails throughout. A few short branches are still laid with iron rails, but these are being replaced with second-hand steel rails removed from the main line in the course of relaying operations.

On both the up and down roads of the main line from Howrah to Allahabad, a distance of about 564 miles, the rails are 85-lb. bull-headed with the exception of a few lengths aggregating 310 miles laid with 88½-lb. bull-headed rails, and 2 short lengths of about 2 miles laid with 75-lb. double-headed rails.

Above Allahabad the main line up to Fatehpur (mile 636) is laid with 85-lb. bull-headed rails. The sections Fatehpur to Kanchaui (about 90 miles), Tundla to Barhan (6 miles) and Khurja to Patpore (about 50 miles) are laid with 88½-lb. bull-headed rails. The rest of the main line and branches are laid with 75-lb. double-headed rails.

The Grand Chord line is laid with 85-lb. rails, between Sitarampur and Gurpa, and with 88½-lb. bull-headed rails, between Gurpa and mile 339, near Sone East Bank (excepting a length of 5 miles) and between mile 375 (near Pisauli) and Moghal Sarai on the newly opened down track between Gya and Kastha and Ganj Khwaja and Moghal Sarai. The remaining length is laid with 75-lb. double-headed rails.

Of the Howrah-Burdwan chord, the Bally-Manirampur and Jangram-Saktighar sections are laid with 90-lb. flat-footed, and the rest with 88½ lb. bull-headed, rails.

The Deoghur and Tarkessur branches are laid with 75-lb. double-headed rails and the Nalhati branch with 88½-lb. bull-headed rails.

As at present laid, about thirty per cent. of the sleepers are wooden and the remainder iron. The wooden sleepers principally consist of sal and deodar; but of late jarrah and Australian hard wood sleepers have also been put into the road. The chairs are cast iron and vary in weight from 38 to 51½ lbs. The iron sleepers are of the Denham-Olpherts' pattern and weigh about 252 lbs. each.

Ballast.—The line, with the exception of the Howrah-Burdwan chord and the Barharwa-Bandel branch, is ballasted throughout with stone.

Fencing.—The line is fenced throughout, except on the Damoodur, Ikrah, Salampur, Chanoh, Pandra, Azimganj, Barun-Daltonganj, Shikohabad-Farukhabad, Barharwa-Bandel and Deoghur branches, the Ondal loop and the Ondal-Sainthia and Dhanbad-Jharia chords.

Curves.—The sharpest curve is of 1,000 feet radius and situate between Agra (Jumna Bridge station) and Agra City station.

EAST INDIAN RAILWAY SYSTEM—*contd.*East Indian railway (5' 6" gauge)—*contd.*Details of construction—*concd.*

Gradients.—The ruling gradient on the main line is 1 in 300, except between Raneegunge and Luckeeserai where it is 1 in 200 with a 1 in 100 banking section, between Simultala and Jhaja, and on the Grand Chord, 1 in 200 (compensated on curves), with a 1 in 80 banking section between Gurpa and Gujhandi. The ruling gradient on the Tarkessur branch, is 1 in 500, on the Howrah-Burdwan chord and the Shikohabad-Farukhabad branch 1 in 400, on the Daltonganj branch, 1 in 333, on the Patna-Gya and Digba Ghat branches, 1 in 250. On the Bandel-Barharwa branch, the Loop line, the Monghyr branch, the Ondal-Sainthia chord, the Khurja-Hapur branch and the Jubulpore branch, it is 1 in 200; on the Azimganj branch, 1 in 100, and on the Deoghur branch 1 in 50.

Great Indian Peninsula railway (5' 6" gauge)—

The Great Indian Peninsula railway comprises the line formerly owned by the old Guaranteed Company of that name (now called the Great Indian Peninsula railway proper), in amalgamation with that of the late Indian Midland Railway Company (now known as the Midland section). The Guaranteed Company's railway was purchased by the State in 1900, when all the contracts then subsisting between the Secretary of State and that Company were determined and a new Great Indian Peninsula Railway Company was constituted. The amount of the purchase price was £34,859,218, of which £23,109,218 is being paid by means of a terminable annuity of £1,268,516, the remaining £11,750,000 being represented by Company's stock issued in exchange for £67,047 of annuity. In addition to the purchase price, the debentures and debenture stock of the Company for which the Secretary of State incurred the liability on purchase amounted to £5,922,350.

The contract between the Secretary of State and the Indian Midland Railway Company, dated the 22nd October 1885, was determined by the Secretary of State on the 31st December 1910. That does not, however, substantially affect the carrying out of the contract, between the Secretary of State and the Great Indian Peninsula Railway Company, dated the 21st December 1900, the effect of which is that the railways formerly known as the "Indian Midland Railway System" are to form part of the undertaking worked by the Company for so long as that contract remains in force.

Nor are the arrangements subsisting at the date of the termination of the Indian Midland Railway Company's contract for working of the Native State branches of that Company's line disturbed in any way by the termination of that Company's contract, the necessary alterations, whereby the Government becomes a party thereto instead of the Indian Midland Railway Company, having been made in the working agreements relating to such branches. The Gwalior Light railway was worked by the Great Indian Peninsula Railway Company up to the 30th June 1913, after which date the working was taken over by the Gwalior Durbar.

Details of construction—

Permanent-way.—On the Great Indian Peninsula railway proper, the main line is laid with 100-lb. bull-headed, 82-lb. bull-headed and 69-lb. double-headed steel rails. The sleepers originally laid were chiefly wooden; these have now to a large extent been replaced by iron pots. The whole of the South-East line, except the Ghat sections, is laid with iron pots. On the Midland section, the whole of the main line, the Manikpur branch, the Cawnpore branch from Jhansi to mile 326.64 and the line from Bina to Katni, are laid with 80-lb. flat-footed steel rails on cast-iron pot sleepers. The Cawnpore branch from mile 351.77 to Hamirpur Road is laid chiefly with 82-lb. bull-headed rails on cast-iron pot sleepers. The main line between Bombay and Igatpuri and Kalyan and Lonavla is being relaid with 100-lb. bull-headed rails on wooden sleepers.

Ballast.—The line is ballasted with sand, gravel, laterite, knukur or stone.

Fencing.—With the exception of the Mohpani, Chalisgaon-Dhulia, Jalgaon-Amalner and Warora-Balharshah branches, the Great Indian Peninsula railway proper is fully fenced. On the Midland section the main line is fenced throughout and the branches are partially fenced.

Curves.—The sharpest curve has a radius of 990 feet on the Bhore Ghat, between miles 75 and 76. The next sharpest curve has a radius of 1,056 on the Thull Ghat, between miles 78 and 79.

Gradients.—On the Great Indian Peninsula railway proper the ruling gradients on ordinary sections of the main line vary from 1 in 100 to 1 in 200, with 1 in 100 banking sections near Vasind and Asvali; the ruling gradient on the Ghat sections is 1 in 37. On the Midland section the ruling gradient between Bhopal and Jhansi is 1 in 200; between Jhansi and Agra 1 in 150 and between Jhansi and Manikpur 1 in 125. The Jhansi-Cawnpore branch is practically level, except at bridge approaches where the gradients are 1 in 250 and 1 in 300, and between Jhansi and Garhmadu where it is 1 in 200.

Contracts—

Dated the 21st December 1900 (called the principal contract), between the Secretary of State and the Great Indian Peninsula Railway Company, as to the maintenance, management and working, by the Company, as one undertaking, of the railways known as the Great Indian Peninsula railway system and the Indian Midland railway system, and the subsidiary lines included therein.

Dated the 24th April 1903 (supplemental to the contract of 1900), between the Secretary of State and the Great Indian Peninsula Railway Company, as to the adoption of 1s. 4d. per rupee as the "prescribed" rate of exchange.

Dated the 4th August 1908 (supplemental to the contracts of 1900 and 1903), between the Secretary of State and the Great Indian Peninsula Railway Company, as to Debenture stock.

Contracts and agreement—

Contract, dated the 18th April 1881, *between the Portuguese Government and the West of India Portuguese Railway Company*, as to the construction of a harbour at the Port of Mormugao and a railway from Mormugao to the Portuguese Frontier.

Contract, dated the 19th December 1892, *between the Portuguese Government and the West of India Portuguese Railway Company*, providing for the guarantee of interest on the Company's capital in consequence of the cessation of the annual subsidy of Rs. 4,00,000, which was formerly paid by the British to the Portuguese Government and hypothecated by the latter to the Company.

Agreement, dated the 21st August 1902, *between the former Southern Mahratta Railway Company and the West of India Portuguese Railway Company*, as to the maintenance and working of the railway from Mormugao to the Portuguese Frontier and the harbour at the Port of Mormugao.

Contract, dated the 28th June 1908 (called the principal contract), *between the Secretary of State and the Madras and Southern Mahratta Railway Company*, as to the continuance of the existing contracts and agreement, subject to the variations and modifications thereof as therein set forth.

Main provisions of contracts and agreement—

- (i) *Land.*—Provided by the Portuguese Government free of cost to the West of India Portuguese Railway Company.
- (ii) *Government aid.*—Guarantee by the Portuguese Government of interest in sterling at 5 per cent per annum on £800,000, and at 6 per cent per annum on any additional capital. The interest is secured (a) on any annual subsidy payable by the British or the British Indian Government to the Portuguese Government, and (b) on the Abkari (excise) duties levied in Goa. Any deficiency is, however, to be made up by the Portuguese Government from other sources.

The line, which is the property of the West of India Portuguese Railway Company, is maintained and worked by the Madras and Southern Mahratta Railway Company as part of the latter's undertaking, except as to further capital expenditure which is provided by the Portuguese Government.

- (iii) *Terms of working.*— } *As between the Madras and Southern Mahratta and West of India Portu-*
- (iv) *Distribution of profits.*— } *guese Railway Companies.*—Railway revenue expenses are in the first instance paid by the Madras and Southern Mahratta Railway Company. Separate half-yearly accounts are kept of the gross earnings respectively of the Madras and Southern Mahratta railway and the West of India Portuguese railway. The gross working expenses of the combined railways (excluding revenue expenditure on new minor works which is borne entirely by the railway—whether the Madras and Southern Mahratta or the West of India Portuguese—incurring it and is in either or both cases excluded from the joint working expenses, and interest payable by the Madras and Southern Mahratta Railway Company on the capital cost of telegraph lines equipped and owned by the Government of India) are borne by the two Companies in the proportion of their respective gross earnings for each half-year.

As to *harbour* receipts and expenses, a separate account is kept of all sources of revenue at the Port of Mormugao. The amount chargeable by the Madras and Southern Mahratta Railway Company for maintenance and working is actuals, plus 10 per cent thereon for superior supervision, subject to the proviso that if in the aggregate they (without the sanction of the West of India Portuguese railway) exceed the mean of the figures which represent the relation of such expenditure to receipts during the years 1895, 1896 and 1899, any such excess is to be annulled, or reduced as much as possible by a corresponding diminution in the charge for supervision.

The profits arising from the West of India Portuguese railway, being the excess of earnings over working expenses so calculated, are to be paid half-yearly by the Madras and Southern Mahratta Railway Company to the West of India Portuguese railway.

NOTE.—At the desire of the Board of the West of India Portuguese Railway the Secretary of State has agreed to 80 per cent of the net earnings of each month being paid to the Joint Representative in India as soon as the accounts of each month are completed. (India Office letter No. P.W.-2962, dated the 27th December 1912).

- (v) *Distribution of profits as between the Portuguese Government and the West of India Portuguese Railway Company.*—The surplus profits in any year, after payment of the guaranteed interest for that year, are to be divided equally between the Portuguese Government and the West of India Portuguese Railway Company.
- (vi) *Rates and fares.*—The maximum rates and fares to be fixed with the consent of the Portuguese Government, and not to exceed the maxima on the Great Indian Peninsula railway; they are also subject to the maxima and minima prescribed in the contracts between the Secretary of State for India and the Madras and Southern Mahratta Railway Company.
- (vii) *Special obligations as to the conveyance of—*
 - (a) *Mails, both British and Portuguese.*—To be conveyed on the West of India Portuguese railway upon the terms of the Treaty of 1878.
 - (b) *Portuguese Government troops, officials, and Government stores.*—To be conveyed on the West of India Portuguese railway on the same conditions as on Indian State railways.

MADRAS AND SOUTHERN MAHRATTA RAILWAY SYSTEM—*contd.***West of India Portuguese railway (3' 3½" gauge)—*consld.*****Main provisions of contracts and agreement—*consld.***

(viii) *Power of the Portuguese Government to determine contract.*—The Portuguese Government may purchase the railway and all other works—

(a) at any time by giving six months' notice;

(b) at any time after the expiration of the first 30 years from the date of opening of the railway or any section thereof, by giving two years' notice.

In the first case the Portuguese Government must pay to the Company in London a sum in sterling not less than the amount actually expended by the Company on the railway and other works, with 10 per cent added, and the value of the rolling-stock, machinery, station appliances and stores.

In the second case the price to be paid by the Portuguese Government is a sum in sterling equal to the amount of the value of all the shares, debentures and stock of the Company calculated according to the mean market value in London during the three years immediately preceding the expiration of the two years' notice (such sum not to be less than the amount actually expended by the Company on the railway and other works), *plus* the value of the rolling-stock, machinery, station appliances and stores.

At the expiration of the term of the contract [99 years, see (xii).] the line becomes the property of the Portuguese Government, but the rolling-stock, machinery, station appliances and stores, and any other movable property or plant, have to be paid for at their fair value.

(ix) *Power of the West of India Portuguese Railway Company to surrender contract.*—The West of India Portuguese Railway Company may make over the railway and works to the Portuguese Government—

(a) in the event of failure on the part of the Portuguese Government to pay the guaranteed interest in full, by giving six months' notice;

(b) at any time after the expiration of the first 30 years from the date of opening of any section of the line without renewal of the Treaty of 1878, by giving two years' notice.

In the first case the West of India Portuguese Railway Company would be entitled to receive from the Portuguese Government, in sterling, the amount actually expended on the railway and works, with 10 per cent added, and the value of the rolling-stock, machinery, station appliances and stores: in the second case, the same amount, less the additional 10 per cent on the expenditure on the railway and works.

(x) *Power of the Madras and Southern Mahratta Railway Company to determine agreement.*—

(xi) *Power of the West of India Portuguese Railway Company to determine agreement.*— } Determinable by either party at the end of two years from the 1st July 1902 (the date on which it came into force) on 6 months' notice given, reckoned either from the 30th June or the 31st December next after the delivery of such notice.

Upon the determination of the agreement the Madras and Southern Mahratta Railway Company to surrender to the West of India Portuguese Railway Company the railway and harbour and their equipment, etc., and to pay to the latter all money held on account of the railway.

(xii) *Term of contract [if not determined under (ix), (x) or (xi)].*—99 years from the date of opening of the line.

(xiii) *Term of agreement [if not determined under (x), or (xi)].*—The term of agreement is 5 years, unless extended* with the consent of both parties, when the West of India Portuguese Railway Company have the right to resume the working of their line and harbour.

* Since extended to 30th June 1922, *vide* Despatch from the Secretary of State No. 17 Railway, dated the 4th May 1917.

Contract and agreement—

Contract, dated the 27th December 1883, between the Government of His Exalted Highness the Nizam of Hyderabad and the Nizam's Guaranteed State Railways Company, Limited, as to the acquisition, management, maintenance and working of the line from Wadi to Hyderabad and Secunderabad, the construction, etc., of certain 5' 6" gauge extensions and the preferential right to construct all new railways in His Exalted Highness the Nizam's territories.

Agreement, dated the 16th March 1897, (supplemental to the contract of 1883), between the Government of His Exalted Highness the Nizam of Hyderabad and the Nizam's Guaranteed State Railways Company, Limited, as to the construction, management, maintenance and working, by the Company, of the Hyderabad-Godavari Valley railway.

Letter No. 257, dated the 7th March 1903, from the Government of His Exalted Highness to the address of the Railways Company as to rates and fares.

Main provisions of contract and agreement—

[**NOTE.**—Under this head, the expression "Government" means the Government of His Exalted Highness the Nizam of Hyderabad, except where otherwise stated.]

- (i) **Land.**—Provided by the Government free of cost to the Company.
- (ii) **Government aid.**—Guarantee of interest in sterling, at 5 per cent per annum on the Company's share (£2,000,000) and debenture (£1,500,000) capital for 20 years, from the date on which such capital is paid up. The guarantee in the case of the share capital ceased on the 25th June 1904, but the guarantee in respect of debenture capital, ceased or ceases, on various dates ranging from 30th June 1904 to 31st January 1928. The Government has accorded sanction to the issues of further debentures, amounting in all to £1,000,000 without any guarantee. Up to date the Government has agreed to take £700,000 of these debentures, of which £500,000 have been issued and loan received against issue of a further £200,000.
- (iii) **Distribution of profits.**—During the period of the guarantee the repayment of the guaranteed interest for each half-year, and thereafter interest for each year, at the rate of 5 per cent on the share and debenture capital, is to be the first charge against the net earnings of such half-year or year. Of any residue, either before or after the cessation of the guarantee, one half is to be applied in payment of guaranteed interest not previously recouped and any other sums owing by the Company to the Government, and the other half is to be retained by the Company. When the Government has been reimbursed, all sums paid under the guarantee, together with simple interest thereon at 5 per cent per annum, the Company is to be entitled to the whole of the net earnings.
- (iv) **Rates and fares.**—Not to exceed those from time to time prevailing on the Great Indian Peninsula railway, unless otherwise agreed between the Government and the Company. [By letter No. 257, dated the 7th March 1903, from the Secretary to the Government in the Financial Department to the Agent and Manager the provisions in this respect of the agreement of 1883 have been modified so as to permit the Company to levy such rates and fares as are not in excess of those which obtained on the Great Indian Peninsula railway at the date of that agreement.]
- (v) **Special obligations as to the conveyance of.**—
 - (a) Mails and Post Office servants of the Government of His Exalted Highness and the Government of India.—To be conveyed free of charge.
 - (b) Troops, officials, and Government stores.—Troops and officials of the Government of His Exalted Highness and the Government of India to be conveyed at special rates; and stores at the lowest rates ordinarily chargeable.
 - (c) Bullion and coin.—At special rates.
- (vi) **Power of the Government to determine agreement.**—In the event of any breach by the Company of any of the provisions of the agreement, the Government may give the Company in London six months' notice of its intention to determine the agreement; and unless the breach shall be remedied within the 6 months, the Government may determine the agreement and assume possession of the railway, paying to the Company in sterling so much of the capital as shall be unredeemed.

The Government may also terminate the agreement and purchase the railway, rolling-stock, etc., on the 1st January 1934, or 1st January 1954, by giving 12 months' notice. If the railway is thus acquired the Government is to pay to the Company, in sterling the amount of the unredeemed capital, plus a bonus of 25 per cent.

At the end of the full term of 99 years, if the agreement continues so long, the land in the possession of the Company, with the railway, buildings, works, and fixed machinery, will revert to the Government free from all debts and charges, but the rolling-stock, plant, movable machinery and stores must be purchased by the Government at their fair value.

†The line was opened by sections on the 5' 6" gauge, using temporary diversions near Dera-
duel—thus Jhelum to Ratial, 1st January 1880 (15 miles) and Ratial to Rawalpindi, 1st October 1880 (56 miles). The diversions were abolished on 8th May 1882; and the complete 1.50 graded through line between Jhelum and Rawalpindi (70.50 miles) was established. But again in 1888, and in subsequent years up to date, various alignments in connection with the improvements of grades to 1/100 have been opened and the present length of line on the 31st March 1897 is—Jhelum to Rawalpindi 76.98 miles.

The decrease in net earnings in 1906 was due chiefly to extraordinary charges incurred in the repairs of flood damages, accounted for by a fall in the gross earnings consequent upon the failure of the wheat export trade from Karachi and the diminution of traffic generally owing to famine and extensive breaches of the line caused by floods.

The decrease is ... ad-Badin section.

 - (a) net earnings of the North Western railway from its traffic interchanged with the Jullundur Doab railway and between the Jullundur Doab railway and foreign lines passing by way of the North Western railway and from traffic, except coaching traffic, originating and terminating at stations on the North Western railway proper (including the stations at Delhi, Samasata, Ferozepore, Ludhiana, Kasur, and Lodhran, Jullundur and Phillaur and including also stations on the Amritsar-Patti railway and stations on any lines joining the North Western railway at Jullundur or Phillaur from the North or the East) and sent over the Jullundur Doab railway, other than the traffic which is subject to rebate under clause 23 of the contract of 1895 or clause 12 of the contract of 1905 or clause 13 of the contract of 1909 or under all such clauses,

Kalka-Simla railway (2' 6" gauge)—

The railway was constructed by, and at the cost of, the Delhi-Umballa-Kalka Railway Company. On the representation of the Company it was decided to purchase the Company's interest in the line. This was effected by the payment of £300,000; the Secretary of State waiving all claims to arrears of unpaid interest on the advances, viz., Rs. 1,16,47,512, made to the Company. The purchase of the line by the State was effected from 1st January 1906; but the Company continued to work it under the direct orders of the Railway Board up to the 31st December 1906. It was made over to the North Western railway administration with effect from the 1st January 1907.

ODDH AND ROHILKHAND RAILWAY SYSTEM—*concl.*

Oodh and Rohilkhand railway (5' 6" gauge)—*concl.*

Details of construction—

Permanent-way.—The main line, which was laid with 75-lb. flat-footed steel rails on cast-iron pot sleepers, is being relaid with 90-lb. flat-footed steel rails, British Standard, on wooden sleepers and about 326 miles, including double line, are practically complete. The pot sleepers in the main line have all been replaced by wooden sleepers. The Benares-Lucknow loop is laid with 75-lb. flat-footed steel rails on cast-iron pot sleepers, of which 63 miles have been replaced by wooden sleepers and 23 miles with 90-lb. flat-footed steel rails. On most of the branches the rails are 75-lb. flat-footed steel. The Bahramghat and Balamau-Madhoganj branches are laid partly with 75-lb. flat-footed steel rails, and partly with 60-lb. iron and steel rails, and the Madhoganj-Auhadpur extension with 60-lb. flat-footed steel rails. The Allahabad-Rae Bareilly-Cawnpore branch is laid with 90-lb. flat-footed steel rails, British Standard, on wooden sleepers.

The sleepers are of the following types:—Stamped steel bowls, cast-iron pots (Fowler's patent box, Walton's, Hederstedts and M.C.), steel trough and wood (sāl, deodar and Australian hard wood).

There are a few wrought-iron saddle back sleepers still in the Kotdwara and Bahramghat branches.

Ballast.—The main line and branches are ballasted with sand, kunkur, stone, shingle and broken brick.

Fencing.—The line is fenced throughout with the exception of the Balamau-Auhadpur, Rosa-Sitapur, Gajroula-Chandpur, Hapur-Meerut, Rajaka-Sahaspur-Sambhal and Kotdwara branches and a portion of the Allahabad-Jaunpur branch.

Curves.—The sharpest curve on the line is of 955 feet radius.

Gradients.—The ruling gradient of the railway is 1 in 400, except between Rajaka-Sahaspur and Sambhal 1 in 333, between Benares and Moghal Sarai, 1 in 300; between Moradabad and Lhaksar, 1 in 200; between Lhaksar and Saharanpur, 1 in 150; and between Najibabad and right bank of the Koh river, 1 in 100.

Contracts—

Nil.—The railway is owned and worked by the State.

Rates and fares.—Certain maxima and minima have been fixed by the Government, between the limits of which the Railway Administration can vary the rates and fares quoted for goods and coaching traffic.

Managing Director.—Neville Priestley, Esq.

Offices.—Finsbury, Pavement House, London, E. C.

Date of registration of the Company.—1890.

The lines formerly owned and worked by the late Great Southern India and the Carnatic Railway Companies were amalgamated on the 1st July 1874, under the title of the South Indian railway which on the 1st January 1891 was purchased by the State and handed over, together with the Villupuram-Guntakal State railway, for working as one undertaking, to a new company—the existing South Indian Railway Company.

With effect from the 1st January 1908 the Jalarpet-Mangalore section of the former Madras railway including the Tirupattur-Krishnagiri, Morappur-Dharmapuri and the Nilgiri railways was incorporated in the undertaking of the South Indian Railway Company, who, from the same date, relinquished and made over to the amalgamated Madras and Southern Mahratta Railway Company the 3' 3½" gauge lines from Katpadi to Dharmavaram and from Pakala to Gudur, and obtained running powers over the Madras-Bangalore section of the Madras and Southern Mahratta railway. The Shoranur-Cochin Native State line was, on the same date, also transferred from the former Madras Railway Company to the South Indian Railway Company for working.

Nilgiri railway (3' 3½" gauge).—

The original Nilgiri Railway Company was registered on the 30th September 1885 with nominal capital of Rs. 25,00,000, and a contract was executed between the Secretary of State and that Company on the 26th February 1886. The original Company went into liquidation in April 1894 and a new Company was formed in February 1896 to purchase the line from the former Company and supply the capital required to complete it and to construct the proposed extension to Ootacamund. The line from Mettupalaiyam to Coonoor was completed by the new Company and opened for traffic on the 15th June 1899. On the offer of the new Company to sell the line it was purchased by the Government for £235,000 on the 1st January 1903. The extension to Ootacamund was constructed by the Government.

Contracts—

Dated the 27th June 1901 (known as the "Travancore contract" and supplemental to the principal contract of 1890) between the Secretary of State and the South Indian Railway Company, as to the construction, maintenance and working of the Travancore Branch.

Dated the 21st December 1910 (supplemental to the contracts of 1890 and 1901) between the Secretary of State and the South Indian Railway Company, modifying the contract of 1901.

Dated the 23rd April 1911 (supplemental to the contracts of 1890, 1901 and 1910) between the Secretary of State and the South Indian Railway Company, as to the adoption of the Government financial year for the preparation of accounts.

 (ii) *Government aid.*—
 } As under South Indian railway (3' 3½" gauge).

- (iii) *Terms of working.*—
 (iv) *Distribution of profits.*—
 } The line is worked by the South Indian Railway Company at the same proportion of its gross earnings of each half-year as obtains on the whole of the Company's undertaking, including the Travancore Branch. The "net revenue receipts" of a half-year so arrived at of the Travancore Branch are then applied, in the following manner and order, in payment to the Government of interest—

- (a) on debentures and debenture stock, and
 (b) due on any capital advanced by the Government
 } for the purpose of the branch;

- (c) the surplus, if any, is divisible between the Government and the Company in the proportion in which the residue of net receipts of the undertaking is divisible as noted against (iii) (d) under South Indian railway (3' 3½" gauge).

If the net receipts of the Branch fall short of the interest charges, the deficiency is first to be divided between the Native State and British sections of the line in proportion to the capital cost of the sections, and as between the Secretary of State and the Company so much of the deficiency

as is attributable to the Native State section is to be borne by the Secretary of State, and so much as is attributable to the British section is to be borne by the Secretary of State and the Company in the proportion in which any surplus of net receipts over interest charges would have been divisible. The Company's share of any such deficiency may be deducted by the Secretary of State from its share of any surplus profits due under the principal contract for the same half-year or under this contract or the principal contract for the next succeeding half-year.

As between the Government and the Travancore Durbar, the latter has under-written the guarantee of interest to the extent of the capital cost of the portion of the line in its territory; and it has been agreed that any surplus retained by the Government in accordance with the foregoing shall be divided between them in proportion to the respective lengths of the British and Native State sections of the line, and that the share of any deficiency attributable to the latter shall be borne by the Travancore Durbar.

The construction of the Assam-Bengal railway as a State line was sanctioned in May 1891. The Assam-Bengal Railway Company was formed in England in April 1892 and took over the works commenced by the State. The late Noakhali (Bengal) railway, which was worked by the Assam-Bengal Railway Company up to the end of 1905, was purchased by Government and amalgamated with the Assam-Bengal railway from the 1st January 1906.

BENGAL AND NORTH-WESTERN RAILWAY SYSTEM—*contd.*Bengal and North-Western railway (3' 3½" gauge)—*contd.*Main provisions of contracts—*contd.*

In addition to the ordinary working expenses and usual contributions to the State Railway and Company's Provident Institutions, the working expenses for each half-year include interest at 4 per cent per annum on all outlay up to the 31st December 1904 expended on "rolling stock," "steamers and barges and landing stages," "stores," and "stations and offices, station machinery, staff quarters and all other works including permanent-way at Sonapore" for joint use, and on all outlay subsequent to that date up to the close of each half-year incurred on the same matters and on "workshops and store buildings, etc." or any other works used for joint purposes. The interest so charged is to be credited to the respective revenue accounts of the Company's railway and the Tirhoot railway undertaking in the ratio of the contributions of capital made to the joint accounts by each.

The working expenses of the open system, exclusive of the charges for maintenance of way so works and stations, other than those for general supervision, are divided between the Company's railway and the Tirhoot railway undertaking in proportion to their respective gross earnings.

The charges for maintenance of way, works and stations, other than the charges for general supervision are appropriated and allotted to the Company's railway or the undertaking on the basis of the actual expenditure incurred by each.

- (iv) *Distribution of profits.*—As to the Company's railway, under the original contract of 1882 any surplus over 6 per cent was to be equally divided between the Government and the Company; but this provision was rescinded by the contract of the 22nd February 1886, which leaves the profits entirely in the hands of the Company.

As to the open system, after deducting half-yearly from the gross earnings of the Company's railway and of the undertaking, respectively, the working expenses noted under (iii), the balance of the gross earnings (termed net revenue) in the case of the Company's line belongs to the Company, and in the case of the Tirhoot railway undertaking is applied in the following manner and order:—

- (a) in payment to the Company of interest accruing in each half-year, after the expiration of the period during which interest is chargeable to capital, at 4 per cent per annum on one half of the capital raised and expended by the Company for the purposes of the railway crossing the Gundak river by a bridge, from Bagaha to Chhitanni, including interest paid out of capital during construction;
- (b) in payment to the Government from the aggregate net revenue for the entire year of interest accruing in such year at 5 per cent per annum on all money advanced or expended by the Government for the purposes of the open lines of the undertaking which have not been repaid to the Government;
- (c) the residue if not in excess of 10 lakhs going to Government and the Company in the proportion of $\frac{4}{11}$ th to the former and $\frac{7}{11}$ th to the latter; if in excess of 10 lakhs then as to 10 lakhs in the aforesaid proportion and as to the balance in the proportion of $\frac{1}{11}$ th to the Government and $\frac{10}{11}$ th to the Company.

The difference between the net revenue of the Company's railway belonging and payable to the Company and the aggregate advances made to the Company, in any half-year, is to be adjusted as soon as known by payments in India between the Government and the Company as the case may require.

- (v) *Rates and fares.*—As to the Company's line—to be approved by the Government, who may require the charge for salt, coal and food grains for full-wagon loads carried not less than 100 miles to be reduced to any rate not below $\frac{1}{4}$ th pie per maund per mile and for passengers not below 2 pies per mile.

As to the open system—for the carriage of through passengers and goods over the Company's railway, of all through and local passengers and goods over the Tirhoot railway undertaking, and of all passengers and goods from and to the undertaking or any connected railway carried over the Company's railway or any foreign railway connected therewith, the Government have the power to fix and vary the classification for passengers and goods and the maxima and minima fares and rates for the several classes of passengers and goods, respectively. Until otherwise fixed no rate for goods is to be higher than one pie or lower than $\frac{1}{16}$ th pie per maund per mile.

Main provisions of contracts—*conold.*

(vi) *Special obligations as to the conveyance of.*

- (a) Mails and post office servants on duty.—To be carried free on the Company's railway ; and on the Tirhoot railway on the same general conditions and at the same rates as may be in force on the 3' 3½" gauge State railways.
- (b) Troops, police, high Government officials and Government stores.—As to the Company's railway, to be conveyed on the same general conditions as those in force on the 3' 3½" gauge State railways, and at rates to be approved by the Government. As to the Tirhoot railway undertaking, to be conveyed on the same general conditions and at the same rates as may be in force on State railways of the 3' 3½" gauge.

And at any time prior to the 31st December 1912, the Government have the right and option to elect that, upon the determination of the contract of 1882 by notice of purchase on the 31st December 1932, they will in lieu of making the aforesaid payment, pay to the Company a sum of money equal to 25 times the average yearly net earnings, less the share of surplus profits belonging to the Government during the five years immediately preceding the 31st December 1912, on the assumption that section 39 (5) of the contract of 1882 had been in actual operation during the same five years. These terms do not apply to the Doab lines referred to in the contracts of 1896, 1907 and 1910, in respect of which the Government undertake to pay to the Company, in the event of purchase, a sum equal to the capital raised and expended thereon with their sanction, including interest paid out of capital during construction. One-half of the capital raised and expended by the Company for the Manjhi Ghat-Bakulha section, including interest paid out of capital during construction, is to be treated as capital attributable to the Doab lines; the other half, and the whole of the capital for the Bagaha-Chhitauni section, including interest paid out of capital during construction, is to be treated as capital attributable to the Company's main lines. The Government may also determine the contract at any time, at six months' notice, if the Company fail to observe its obligations, on paying the value of rolling-stock, stores, etc., and fair value of the line, less the value of the same treated as a reversionary sum absolutely payable on the 31st December 1931.

(viii) *Power of the Government to determine the contracts relating to the Tirhoot railway undertaking.*—If the original contract with the Company, dated the 12th December 1882, terminate for any reason prior to the expiry of the term of the contracts relating to the Tirhoot railway undertaking, then the latter also, *ipso facto*, terminate at the same time. The Government may also terminate the Tirhoot railway contracts at any time, on 6 months' notice, if the Company fail to observe its obligations. The Government may also terminate the Tirhoot railway contracts on the 31st December 1919*, on 6 months' notice: or, at the same date and by the like notice, the

Government may modify or alter the terms with the approval of the Company as from the 31st December 1919*; but if the Company do not agree to the proposed modifications or alterations then the contracts will terminate on the 31st December 1919*. On the determination of the Tirhoot railway contracts the Government will resume possession of the undertaking, and any capital sums which may have been raised by the Government and expended on the Company's lines, or raised and expended by the Company on the undertaking, are to be considered as debts due from the Company and the Government respectively.

(ix) *Power of the Company to surrender contracts.*—Nil.

(x) *Term of contracts relating to the Company's railway.*—99 years, i.e., until the 31st December 1981, subject to (vii).

(xi) *Term of contracts relating to the Tirhoot railway undertaking.*—28 years, i.e., from 1st January 1905 to the 31st December 1932, subject to (viii).

Permanent-way.—The permanent-way consists of 50-lb. flat-footed steel rails laid principally on *pyinkado* sleepers.

Ballast.—The ballast consists chiefly of broken stone and shingle.

Fencing.—The Pegu-Moulmein extension is fenced but not the Henzada-Kyangin extension. Level crossings are provided with either gates or chains and posts.

Curves.—The radius of the sharpest curve on the Pegu-Moulmein section is 1,058 feet and that on the Henzada-Kyangin section is 1,432 feet.

Gradients.—The ruling gradient is 1 in 300 on the Pegu-Moulmein extension; and 1 in 200 on the Henzada-Kyangin extension, uncompensated.

Contracts—

Contract, dated the 22nd February 1907 (supplemental to the contracts of 1897 and 1903, noted under Burma railways, 3' 3½" gauge), between the Secretary of State and the Burma Railways Company, as to the construction, maintenance, management and working as State railways of the Pegu-Moulmein and Henzada-Kyangin extensions and the Daga loop line.

Contract, dated the 7th April 1913, (read as part of the supplementary contract of 22nd February 1907), between the Secretary of State and the Burma Railways Company, defining the manner in which the earnings of the Burma Railways Extensions shall be ascertained and in particular the proper apportionment of receipts and expenditure in connection with through traffic and of expenses of stations common to the Burma Railways and Extensions.

Contract, dated the 3rd October 1916 (supplemental to, and modifying, the contract of 22nd February 1907) between the Secretary of State and the Burma Railways Company, as to the exclusion of the Daga loop line from the list of State railways mentioned in the contract of 22nd February 1907.

Main provisions of contracts—

- (i) **Land.**—As under 'Burma railways (3' 3½" gauge).
- (ii) **Government aid.**—All moneys required for the purposes of the extensions shall be supplied by the Secretary of State according to such arrangements as shall, from time to time, be made between the Secretary of State and the Company.
- (iii) **Terms of working.**— } Separate half-yearly accounts are kept for (a) the whole of the Company's system and (b) for each of the extensions, except in regard
- (iv) **Distribution of profits.**— } to the Revenue Abstracts B. to G., inclusive, and sub-head I of Abstract A. which are for the system as a whole. The total working expenses of the whole system, are divided between each of the extensions and the rest of the Company's system in the ratio of their respective gross earnings, and the share of expenses so attributed, together with the maintenance expenditure relating exclusively thereto under sub-heads II to VII of Abstract A. are deemed to be the actual working expenses of each. The extensions have also to bear proportionate charges in respect of interest on capital cost of workshop buildings and plant and joint station expenses. After deducting from the gross earnings the working expenses so arrived at, the balance forms the "net revenue receipts."

The net revenue receipts for each complete financial year are applied in payment of interest at 3½ per cent per annum on the total capital outlay on each extension (including the value of land), and the mileage share of interest on the main line stores and stores suspense balances; and the residue, if any, is divided between the Government and the Company in the proportion of ⅓ths to the former and ⅔ths to the latter.

- (v) **Rates and fares.**—As under Burma railways (3' 3½" gauge).
- (vi) **Special obligations as to the conveyance of.**—

If the principal contract [noted under Burma railways (3' 3½" gauge)] shall at any time be determined by virtue of its provisions, then this contract shall also thereupon cease and determine. On the failure by the Company effectually to remedy any breach of this contract or of its stipulations or provisions within six months after due notice shall have been given by the Secretary of State in England, he may, on the expiration of six months or later, determine the contract by giving to the Company in England notice in writing of such determination. Main provisions of contracts—

- (i) *Land*.—Land for the Company's railway constructed in pursuance of the original contract was provided by the Government free of cost to the Company, subject to the condition that the Company pays, on demand, to Government the cost price of land purchased by Government for the purposes of the Company's railway. Land for the railway from Gola Gokarn Nath to Pilibhit, and for all the other State lines provided by the Government after the 1st January 1891 is charged to capital subsequent to the date of the principal contract. Land for Branch railways and Branch line works is provided free, except and excluding land required for quarrying ballast, brickfields or kindred purposes.
- (ii) *Government aid*.—Government guaranteed interest at 4 per cent per annum in sterling on the capital up to £200,000 expended on the Company's original railway until its opening throughout for public traffic but for no longer than and including 1st January 1885; thereafter a subsidy of Rs. 20,000 half-yearly for ten years from the date of opening, which ceased on the 31st December 1894.

In the case of the *Lucknow-Bareilly* railway the Government guarantee the principal and interest in respect of debentures for the nominal amount of £147,000 issued by the Company in order to raise the sum of £160,000 (the sum actually realised being £160,887).

[NOTE.—Of these, debentures for £40,000 and £82,000 were paid off from advances by the Secretary of State in England on 1st July 1911 and 1st July 1916, respectively.]

The Company reimburses the Government any amount by which the interest payable under the guarantee may exceed Rs. 96,000 in any one year.

All sums advanced by the Government after the 31st December 1900 bear interest at the rate of 3½ per cent per annum.

- (iii) *Terms of working*.—The Lucknow-Bareilly railway is worked in conjunction with the Company's own line, a joint account of working expenses being kept. Joint working expenses account includes—

- (b) in payment of interest on the Company's Main Line Stock (being part of the Joint Debenture Stock),
- (c) in payment of interest on borrowed capital, and
- (d) in payment of interest at 6 per cent per annum on the *bond file* paid-up share capital of the Company.

The surplus is divided equally between the Government and the Company.

The net earnings of the Lucknow-Bareilly railway and "the State Works", i.e., of the undertaking, are applied in the following order :—

- (b) in payment of the interest at 4 per cent per annum on the State Stock (being part of the Joint Debenture Stock), except interest on such portion of the State Stock as may for the time being be appropriated for lines under construction, which latter is charged to capital till the close of the half-year next after the opening of lines to traffic,
- (c) in payment of the interest on the debentures of £147,000 issued by the Company in 1890 and of interest at 4 per cent per annum on any further capital supplied by the Company or advanced by the Government for the purposes of the undertaking (3½ per cent per annum on Government advances subsequent to the 31st December 1900),
- (d) in payment to the Government of interest at 4 per cent per annum on the value at cost price of the railways, rolling-stock, plant, machinery and land handed over to or retained by the Company on the 1st January 1901 (standing to debit of Part I of the Capital Account), and
- (e) the residue is divided between the Government and the Company in the ratio of their respective shares of capital in the undertaking.

[Note 1.—The State Stock (part of Joint Debenture Stock), excluding and except so much of it as is appropriated for the construction of the Pilibhit-Bamdeop railway, does not participate in profits either as Government capital or as Company's capital.]

[Note 2.—The amount advanced by the Secretary of State to pay off debentures for £22,000 (part of £147,000 vide (ii) above) and note in connection therewith does not affect the capital of either the Secretary of State or the Company for the purposes of division of surplus profits of the Lucknow-Bareilly railway.]

Contract of 1882: The Government may terminate the contract at the end of the 50th year, i.e., on the 31st December 1932, by giving 12 months' notice. If the contract terminate by such notice, or by the efflux of time, the Government are to pay to the Company 25 times the average net earnings, less the Government share of surplus profits, during the 5 years immediately preceding either the date of the termination or (at the option of the Government) the 31st December 1912.

[*Note.*—The cost of making good any shortcomings which render the value of the line not commensurate with the capital expended may be deducted from the purchase price payable.]

The Government may also determine the contract at any time on 6 months' notice (called the "Notice of Determination") if the Company fail to observe its obligations, on payment of the value of the permanent-way, stock and plant, or may call upon the Company to accept the same in lieu of payment, in which latter case the Company must remove its property within 9 months from the termination of the contract, otherwise it becomes the property of the Government.

Contract of 1890: If the original contract with the Company, dated the 12th October 1882, terminate for any reason, then the contract for the working of the Lucknow-Bareilly railway *ipso facto* terminates at the same time. The Government may also determine the contract on 6 months' notice (called the "Notice of Determination") if the Company fail to observe its obligations.

On the determination of the contract the Government will resume possession of the State railway, and at their option will either repay the capital that has been received from the Company for the purposes of the undertaking, or will take over the liability of the Company in respect of such capital. If the capital is repaid, the payment may, at the option of the Government, be made either in England or in India.

Contract of 1904: If the original contract with the Company, dated the 12th October 1882, terminate either by "Notice of Purchase" or by the efflux of time, then the contract of 1904 terminates at the same time, in which case the Government are to pay to the Company 25 times the average net earnings of the Lalkua-Kashipur-Morahabad-Ramnagar branches during the 5 years immediately preceding the termination, provided such sum does not exceed by more than 20 per cent, nor be less than, the capital expenditure on those railways.

[*Note.*—The cost of making good any shortcomings which render the value of the line not commensurate with the capital expended may be deducted from the purchase price payable.]

The Government may also determine the contract at any time on 6 months' notice (called the "Notice of Determination") if the Company fail to observe its obligations, on payment of the value of the permanent-way, stock and plant, or may call upon the Company to accept the same in lieu of payment, in which latter case the Company must remove its property within 9 months from the termination of the contract, otherwise it becomes the property of the Government.

Contract of 1909: By clause 18 of the contract of the 24th March 1909, if either the contract of 1890 be determined from any cause or that of 1909 be determined by "Notice of Purchase" as far as each relates to "the State lines", but not further or otherwise, then the other of the two contracts *ipso facto* terminates at the same time.

- (b) the contract of 1909 so far as it relates to "the Branch Line Works" terminates *ipso facto* with the determination by "Notice of Determination" of the contract of 1904, except as noted above against clauses 18 and 20 of the contract of 1909 and also except as provided for in clause 77 of the contract of 1890, the several powers of the Government to determine by "Notice of Determination" the contracts respectively of 1882, 1890 and 1904, and also that of 1909 so far as they relate to "the State Line Works" to "the Additional Main Line Works" and to "the Branch Line Works", remain separate and unaffected, and are exercisable as to any one or parts thereof independently and without prejudice as to the continuance of the others or parts thereof, in the event of the Company failing to observe its obligations contained in the contract or part of the contract which it is sought to determine: provided that the powers of the Government to determine, by "Notice of Determination", the contract of 1909 so far as it relates to "the Additional Main Line Works" and to "the Branch Line Works" are exercisable separately in respect of any line or branch forming an independent part of such works, if the Company fail to observe its obligations in regard thereto.

(viii) Power of the Company to surrender contract.—Nil.

(ix) Term of contract.—Those of 1882, 1901 and 1909, up to the 31st December 1931; that of 1890, up to the 31st December 1932.
